

## Implementation Planning Worksheet

What are the top 3 strategies you want to implement to meaningfully engage low-income, native, and students of color around the connection between college (any postsecondary pathway) and the careers or jobs of the future? Write down your goals next to A, B, or C.

A	B	C

How do you currently support low-income, native, and students of color in making the connection between college and career?

What factors (knowledge, understanding on the topic, economic data, etc.) have shaped the way you talk to low-income, native, and students of color about the connections between college and career?

What values do you personally hold that support the way that you engage with low-income, native, and students of color students around connecting college to career?

Describe what you will need to do (these might be new behaviors, reprioritizing, gaining more information) that will help actively engage low-income, native, and students of color students understand the connection between college and career.

What are some values that you can adopt to support low-income, native, and students of color students make the connection between college and career to students?

Obstacles to consider	Strengths that will help
What are some obstacles or roadblocks that might prevent you from achieving the goals listed above?	What are some strengths (connections to the community, additional funding, etc.) that can help you accomplish the strategies listed above?

List any school, community, or statewide initiatives, policies or procedure(s) that might help you engage students around the connection between college and careers?
